2015 State of Illinois USCC Cyber Camp

July 13-17 | Moraine Valley Community College, Palos Hills, IL

Cybersecurity experts agree that the United States is very vulnerable to cyber attacks from unfriendly countries, groups and individuals. Some experts have reported that we have less than 10% of the highly skilled cybersecurity professionals required to secure our informaton infrastructure.

Help US change that statstic... sponsor the State of Illinois USCC Cyber Camp today!

The mission of the USCC:
The mission of U.S. Cyber Challenge (USCC) is to significantly reduce the shortage in the cyber workforce by serving as the premier program to identify, attract, recruit and place the next generation of cybersecurity professionals. USCC's goal is to find 10,000 of America's best and brightest to fill the ranks of cybersecurity professionals where their skills can be of the greatest value to the nation.

Benefits of Sponsorship

For more information regarding ALL of the USCC Cyber Camps please visit: www.uscyberchallenge.org/cyber-camps/

This camp features one week of specialized cybersecurity training that includes workshops, a job fair, and a culminating "Capture the Flag" competition. The workshops are led by college faculty, top SANS Institute instructors, and cybersecurity experts from the community. The workshops and presentations focus on a variety of topics ranging from intrusion detection, penetration testing and forensics.

Participants can also participate in a job fair that provides them the opportunity to meet with USCC sponsors and discuss potential employment. The weeklong program ends with a competitive "Capture the Flag" competition and an awards ceremony attended by notables in the cybersecurity industry and government.

"We view the cyber challenges & competitions as the critical part of the outreach effort that is going on across the country to reach young people & get them interested in cybersecurity."

– Ernest McDuffie
Lead for National Institute of Standards and Technology (NIST)

Participants of the camp competed in the qualifing Cyber Quests online competition in April 2014 to earn a spot at a USCC Summer Cyber Camp. Camp spaces are limited, competitive and by invitation only, so the elite group of attendees have tested their cyber skills and advanced into their next journey toward being a "cybersecurity defender".

Benefits of Sponsoring the State of Illinois Cyber Camp:

- Being at the forefront of deploying the next generation of cybersecurity specialists
- Interacting with potential cybersecurity professionals to protect and defend your company's assets
- Helping train America's future cybersecurity experts
- Being an active participant in camp activities
- Inclusion in all marketing and public relations materials
- Have a visible presence at camp-related special events
- Have an immediate impact on sponsoring talented individuals considering cybersecurity careers
